PERSONAL PROJECTS

Unreserved E ticket system (02/2022 - 07/2022)

- This project is based on Chennai suburban trains. The passengers can book their tickets online and then travel. My contribution to this project is front-end development, where I will be responsible for designing and implementing the user interface.

Online Examination and evaluation (02/2023 - 07/2023)

- This project is based on school management, where teachers can conduct exams online and obtain immediate results. My contribution to this project is front-end development, where I will be responsible for designing and implementing the user interface.

APJ Abdul Kalam Tribute Page (05/2023 - 05/2023)

- This is my first individual project for the good practice and understanding in the UI, Bootstrap and Grid system in web application.

Sign in and sign up form (03/2023 - 04/2023)

- This is a project that help me To Have a good understanding and practice in Javascript validation and JQuery.

Dynamic Color Change App using React (07/2023 - 07/2023)

- The Dynamic Color Change App represents a concise yet impactful project aimed at providing hands-on experience and a comprehensive understanding of two fundamental concepts in React 'useState' and 'Props'. Through this project, you gain practical insights into React's core functionalities while creating an engaging and visually appealing color exploration application.

To-Do List (08/2023 - 08/2023)

- The React To-Do List project is a compact and insightful endeavor designed to provide a comprehensive learning experience encompassing essential concepts in React development. Through this mini project, you will gain a solid understanding of useState, Props, controlled inputs, the Fetch API, and the fundamental principles of CRUD (Create, Read, Update, Delete) operations within a real-world application context.
